DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE

This house is located about 1/2 mile west of Maryland Route 66 and about 1/2 mile south of its junction with U.S. Route 40 in Washington County. It is situated on a gentle slope of the east bank of the Beaver Creek and faces south toward the house discussed in form WA-II-085, about .20 miles away.

The structure is a two-story, four-bay stone dwelling partially covered with stucco and trimmed with white. A one-story, two-bay kitchen wing extends to the rear or north of the main house.

The walls are constructed of roughly coursed local fieldstone with large, more carefully cut quoins. Most of the east and north walls are covered with buff stucco or "rough cast." The exposed masonry shows no decorative stonework.

Windows appear to be placed in the walls with some effort at uniformity. They show generally similar framing which is modern and contain six-over-six pane double-hung sashes. Windows at the first floor level are larger than those at the second story.

The main entrance is located in the second bay from the west end of the house. The doorway is treated quite simply with a four-light transom present over the six-panel door. Another simply framed entrance opens into into the east wall of the kitchen wing.

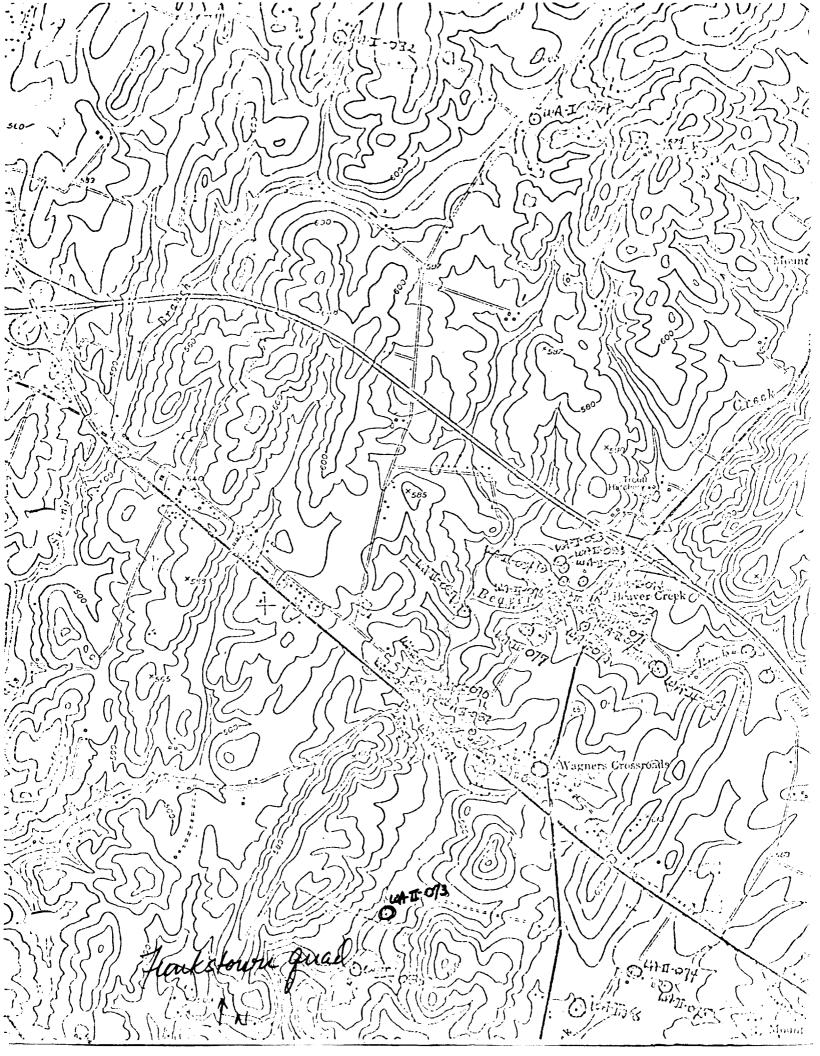

A one-story gable roof entrance porch is present at the main entrance. The roof is covered with sheet metal and extends for several inches beyond the end walls of the house. The eaves are finished with boxing under 'which is a band of quirked quarter round molding. Brick chimneys with corbels at their tops are located inside each gable end and inside the end of the el.

A short distance south of the house is a two-pen log barn covered with vertical board siding. The log shows "V" notched joining.

The house is in good condition and stands on a tract containing 137.75 acres.
